STANDARD CATCH BASIN MEASURING FORM

This form is not to scale, but it works well when you just put in the dimensions. Most ring and covers are based on a 24 inch lid and a 22-3/8 inch pass through but some are larger or smaller, the interior diameter is important. The reason that we need the ring opening position is to make the Curb Basket System to allow the basket to be under the manhole for easy cleaning by Vacuum truck or by hand.

Please print your name. _____ Phone # _____

This catch basin approximate location. _____
